or o		

## **Description**

pluriSpin® Human Monocyte Depletion is designed to isolate pure, viable and untouched monocytes-free population from whole blood, buffy coat, cord blood or similar sample material by negative isolation. The product labels monocytes, while the isolated human monocytes-free population are left in the sample. When centrifuged over a density medium the unwanted cells pellet along with the RBCs. The purified monocytes-free population are present as a highly enriched population at the interface between the plasma and the density medium.

## **Additional Information**

Species	Human	
Cell Types	Monocytes
