

## pluriSpin® Human Monocyte Enrichment

Order No.	Size
19-01001-31	2 ml
19-01001-32	10 ml

### Descripción

pluriSpin® Human Monocyte Enrichment is designed to isolate pure, viable and untouched monocytes from whole blood, buffy coat, cord blood or similar sample material by negative isolation. The product labels T cells, B cells, NK cells and granulocytes, while the negatively isolated human monocytes are left in the sample. When centrifuged over a density medium the unwanted cells pellet along with the RBCs. The purified monocytes are present as a highly enriched population at the interface between the plasma and the density medium.

### Additional Information

Especies	Humano
Tipos de células	Monocitos
Material de muestra	Whole Blood, PBMC, Buffy Coat, Cord Blood, Bone Marrow, Primary Cell Solution
Pureza	>90%
Condición de almacenamiento	La temperatura de la habitación
Declaración reglamentaria	For research use only. Not for use in diagnostic procedures,
