

Re-Strainer (In-Line-Strainer) 500 µm - Sterile

Order No.:43-75500-40

Description

The Re-Strainer is a filtration device for high volumes of liquid to exclude or concentrate particles from liquids with the possibility of particle recovery. The 6 ml recovery reservoir can be accessed by unscrewing the cap. The Re-Strainer has two female luer-lock-ports.

These ports can be used to connect several Re-Strainer to a filter cascade (male to male luer-lock connector) or integrate the Re-Strainer as an in-line-strainer via luer-lock tube adaptor.

The mesh is an integrated part of the housing to give the device maximum mechanical stability.

Application

- Filtration of large sample volume
- Cascade filtration
- Size-fractionation of particles
- Removal of smaller impurities
- Concentration of rare particles from large volumes
- Cartridge for affinity chromatography gels

Additional Information

| | |
|-----------|-------------------|
| 交付时间 | 1-2 |
| Mesh Size | 500 µm |
| 包装 | 4 devices per bag |
| 大小 | 20 pcs. |

| | |
|-----------------|--|
| 颜色 | neon pink |
| 流量控制 | yes |
| Mesh Fixation | Injected in housing for strong hold |
| Fabric material | PET (Polyethylenterephthalat) |
| 外壳材料 | LD-PE (Low Density Polyethylen) |
| 不育症 | Sterile |
| 稳定性 | Good resistance to non-oxidizing acids and bases, fats, most organic solvents |
| 运输条件 | Room Temperature |
| 储存条件 | Room Temperature |
| 规范性声明 | For research use only |
| 法律信息 | The product is for research and development only, not for diagnostic or therapeutic use |

Warning and Limitations

This product is for research and development only, not for diagnostic or therapeutic use.
