

pluriSpin® Human Monocyte Enrichment (10 ml)

Order No.:19-01001-32

Description

pluriSpin® Human Monocyte Enrichment is designed to isolate pure, viable and untouched monocytes from whole blood, buffy coat, cord blood or similar sample material by negative isolation. The product labels T cells, B cells, NK cells and granulocytes, while the negatively isolated human monocytes are left in the sample. When centrifuged over a density medium the unwanted cells pellet along with the RBCs. The purified monocytes are present as a highly enriched population at the interface between the plasma and the density medium.

Additional Information

大小	10 ml
品种	Human
细胞类型	Monocytes
样品料	Whole Blood, PBMC, Buffy Coat, Cord Blood, Bone Marrow, Primary Cell Solution
纯度	>90%
储存条件	4-8 °C
规范性声明	For research use only. Not for use in diagnostic procedures,
