Descrizione

pluriSpin® Human NK Cell Depletion is designed to isolate pure, viable and untouched nk cells-free population from whole blood, buffy coat, cord blood or similar sample material by negative isolation. The product labels NK cells, while the isolated human nk cells-free population are left in the sample. When centrifuged over a density medium the unwanted cells pellet along with the RBCs. The purified nk cellsfree population are present as a highly enriched population at the interface between the plasma and the density medium.

Additional Information

Specie	Umano	
Tipi di celle	Cellule NK	
Materiale campione	Whole Blood, PBMC, Buffy Coat, Cord Blood, Bone Marrow, Primary Cell Solution	
Purezza	>90%	
Condizione di conservazione	Temperatura ambiente	
Dichiarazione di regolamentazione	For research use only. Not for use in diagnostic procedures,	

Warning and Limitations

This product is for research and development only, not for diagnostic or theurapeutic use.
