A TIME	Order No.	Size
	19-01001-31	2 ml
pluriSpin native cel Secentian	19-01001-32	10 ml
Henny		

## **Description**

pluriSpin® Human Monocyte Enrichment is designed to isolate pure, viable and untouched monocytes from whole blood, buffy coat, cord blood or similar sample material by negative isolation. The product labels T cells, B cells, NK cells and granulocytes, while the negatively isolated human monocytes are left in the sample. When centrifuged over a density medium the unwanted cells pellet along with the RBCs. The purified monocytes are present as a highly enriched population at the interface between the plasma and the density medium.

## **Additional Information**

Species	Human	
Cell Types	Monocytes	
Sample Material	Whole Blood, PBMC, Buffy Coat, Cord Blood, Bone Marrow, Primary Cell Solution	
Purity	>90%	
Storage Condition	Room Temperature	
Regulatory Statement	For research use only. Not for use in diagnostic procedures,	

## **Warning and Limitations**

This product is for research and development only, not for diagnostic or theurapeutic use.
